Functional Hip Joint Model

Description

Functional Hip Joint Model

The Functional Hip Joint Model is an anatomy model from Educational lab Equipments and manufactured in India. Use this life-size and fully flexible hip joint to demonstrate abduction, anteversion, retroversion, internal/external rotation and much more. The functional joint consists of portions of femur, hip bone and joint ligaments. This Functional Hip Joint Model provides a graphic demonstration of the anatomy and mechanics of the human hip joint, allowing better doctor-patient or teacher-student understanding of the anatomy of the hip joint. The Functional Hip Joint Model is on a stand for easy display in the classroom or doctors office. Detailed study of the anatomy of the human hip bone is easy with this realistic best quality model.
