

Product Code . EL-PLE-10286

Metal Cylinders

Description

Metal Cylinders

These cylinders are used in density and specific gravity measurement. The ends are carefully turned and surfaces are smooth. Set of six different elements in cylindrical form for density in electrical and thermal experiments. The set consists of one piece each of brass, copper, zinc, aluminum, iron and lead solid cylinders. Custom made sizes and materials also available including non metal materials like plastic, wood, etc.
