

Product Code . EL-MLE-10473

Clinometer Compass

Description

Clinometer Compass

A clinometer is a tool that is used to measure the angle of elevation (Angle from the Ground) in a right angled triangle.

This can be used to measure the height of tall things that you can't possibly reach the top of such as flag, poles, buildings etc.

A must have tool for students working in the field of earth science or geological surveying, mapping or for navigational use.

Compact and handheld clinometer for measuring heights, slopes, and angles.
