

Product Code . EL-EELE-11329

Fibre-Optic Simplex Digital Transceiver Trainer

Description

Fibre-Optic Simplex Digital Transceiver Trainer

Features:-

- Timer IC for square wave frequency generator.
- Three potentiometers to vary R (threshold resistance), R (input resistance) and frequency.
- Fiber optic digital transmitter @ 660nm.
- The board consists of the following built-in parts.
- Two isolated IC regulated D.C. power suppliers.
- Fiber optic digital receiver.
- Adequate no of other electronic components.
- Adequate no. of patch cords stackable 4mm spring loaded plug length ½ meter.
- Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections / observation of waveforms.
- Strongly supported by detailed operating instructions, giving details of object, theory, design procedures, report suggestions and book references.
- Mains on/off switch, fuse and jewel light.

-
- The unit is operative on 230V $\pm 10\%$ at 50Hz A.C. mains.
 - Dimension: W 340 x H 110 x D 210.
 - Weight: 3 Kg. (approx).

We are leading manufacturers, suppliers of Fibre-Optic Simplex Digital Transceiver Trainer for Electronics Engineering Lab Equipments. Contact us to get high quality Fibre-Optic Simplex Digital Transceiver Trainer for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
