

Description

Advanced Three Phase PV On-Grid Training System

The System should cover like or better
than the following:

- Design and testing of Three phase PV systems with National Grid.
- Determination of the grid-connected inverter efficiency.
- Investigation of response of Three phase PV to mains failure.
- Measure generated power of Three phase PV systems.
- Electrical installations of Three phase PV systems.

We are leading manufacturers, suppliers of Advanced Three Phase PV On-Grid Training System for Electronics Engineering Lab Equipments. Contact us to get high quality Advanced Three Phase PV On-Grid Training System for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Educational Lab Equipments,
#449, HSIIDC, Industrial Area, Saha,
Haryana
