

Product Code . EL-CS-11486

Mobile Communication Training System

Description

Mobile Communication Training System

This stand-alone equipment combines both hardware and software and is able to carry out Mobile communication experiments. The system consists of a set of two tripods – one for mounting the transmitting antenna and another tripod for mounting the receiving antenna, 10 different types of Mobile antennas, two Base station PLL synthesized units , two Mobile PLL synthesized units and all the necessary cables and accessories. It provides same conversation quality as commercial products in the market and is expected to lead students quickly settle into work environment.

Specifications:-

- PLL synthesized base station and remote units.
- Full duplex voice & data communication link.
- 2 mobiles and 2 base station units.
- Automatic retry mode.
- 10 types of mobile antennas.
- Propagation environment experiment.
- Successful or failed data packet acknowledgment.

We are leading manufacturers, suppliers of Mobile Communication Training System for Communication System. Contact us to get high quality Mobile Communication Training System for Communication System for schools, colleges, universities, research labs, laboratories and various industries.
