

Product Code . EL-CS-11488

Amplitude Modulation And Demodulation Kit

Description

Amplitude Modulation And Demodulation Kit

Provides Sine Wave output of 1 KHz and Max. 10V p-p. Provision for Amplitude adjustments provided using Top Rotor. Amplitude Modulation and Demodulation Kit regulated power supply On board power supply of +12V and -12V are provided. Sine Wave Generator: Provides Sine waveform output using. Frequency of the Carrier Waveform is 0.2 MHz and Max. 680mV p-p. On-board Block features Am-Modulator circuit using CE Amplifier. Amplitude Demodulator using Diode Detector method. Test points are provided to analyze signals at various points. RF Carrier Generator Carrier generation using JET VHF Amplifier. Amplitude adjustments of carrier waveform possible.

We are leading manufacturers, suppliers of Amplitude Modulation And Demodulation Kit for Communication System. Contact us to get high quality Amplitude Modulation And Demodulation Kit for Communication System for schools, colleges, universities, research labs, laboratories and various industries.
