Product Code . EL-MCE-11490
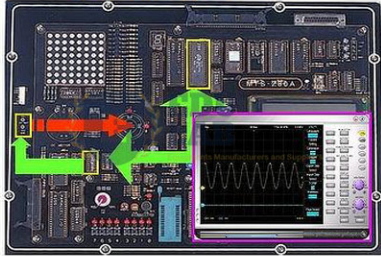

Z-80 Microcomputer Trainer

Description

Z-80 Microcomputer Trainer

Debug functions are also available via PC or system keypad interface. Students edit and make a assembly program codes from PC and observe instant results after they download and execute programs from system memory.

Features :-

• Power supply and all experimental peripherals are built in a single unit to carry out Z-80 experiments that require no additional equipment.

• All chip sets are protected by an acrylic cover on the top of trainer panel.

• Demo programs are permanently stored in system ROM to offer quick system test and functional demonstration.

• Programming codes are downloaded / debugged / executed via PC or trainer keyboard.

• All chip names are clearly printed in corresponding position on acrylic panel.

• External interface allows user to create user-defined circuits.

We are leading manufacturers, suppliers of Z-80 Microcomputer Trainer for Microcomputer Control

Equipment. Contact us to get high quality Z-80 Microcomputer Trainer for Microcomputer Control Equipment for schools, colleges, universities, research labs, laboratories and various industries.
