

Product Code . EL-ACM-11523

Common Rail Injection

Description

Common Rail Injection

On the left and right of the cut- away manifold, you can see the rail pressure sensor and the rail pressure transmitter. The fuel is fed by the feed pipe (gear wheel pump, cutaway) to the high-pressure pump. By turning the clamp screw grip, you see the generation of the high pressure. On this model board, the most important elements of the common rail injection unit can be setup and connected to fuel lines. Further, the return passage of the fuel can be seen. From here, the fuel is pushed into the cutaway manifold and then enters the injectors.

We are leading manufacturers, suppliers of Common Rail Injection for Automotive Cutaways Models. Contact us to get high quality Common Rail Injection for Automotive Cutaways Models for schools, colleges, universities, research labs, laboratories and various industries.
