

Product Code . EL-ALTE-11541

Motor Car Engine Petrol Automobile Engineering Model

Description

Motor Car Engine Petrol Automobile Engineering Model

The basic principles of operation of a four cylinder four strokes automobile engine are clearly demonstrated by this open construction model.

Distributor is connected to camshaft and cam shaft is connected to crank shaft by gears and the both are completely exposed. 2.5 volts bulbs (above each cylinder) flashes to show proper firing order. The convenient size and ruggedly built model is mounted on a wooden base. Fitted with F.H.P. 220 volts A.C. motor. By turning a crank handle attached to on a end of a drank shaft, pistons move, intake and exhaust valves open and close.

We are leading manufacturers, suppliers of Motor Car Engine Petrol Automobile Engineering Model for Automotive Lab Training Equipments. Contact us to get high quality Motor Car Engine Petrol Automobile Engineering Model for Automotive Lab Training Equipments for schools, colleges, universities, research labs, laboratories and various industries.
