

Product Code . EL-TWL-11832

Data Acquisition Card

Description

Data Acquisition Card

Description:-

It facilitates the interfacing of real world signals with PC through USB bus.

Data Acquisition System is very useful for sensing and controlling Analog and Digital signals for any process.

Screw terminals are provided for easing connections.

All pins are multi-functional and user can change the operation of selected pins as per the requirement.

Features:-

Two unity gain amplifiers given to strengthen the weak signal from any sensor

User can change I/O as per need

Removable screw terminals for easy signal connectivity

4 Analog Inputs

User can make desired software by using VB6 or VB.net

Multifunction board to control from PC using USB

User friendly software

2 Analog Outputs

22 digital Inputs and outputs
