Product Code . EL-TWL-11833

Data Acquisition System with SD card

Description

Data Acquisition System with SD card

Description:-

DAQ device endowed with true high quality measurement, its ability of logging data in micro SD Card makes it favorable for user to examine intimately all the measurement using our PC software at any time.

This device comes with 4 GB micro SD card which is having storage facility of logging data up to 2 year.

For easy connections, screw terminals are provided.

It also incorporated real time display functionality over LCD and 7 Segment intended for easy view.

Features:-

Micro SD card (4GB) storage capacity

Logging capacity of 2Year

In-built RTC with CMOS battery backup

Graph view: Second/Minute/Hours/Day

Auto insert data from SD card

LED and LCD display

8 Single ended analog inputs

Globally availability of data or graph

Up to 76.9KSPS speed

Built in signal conditioning

Can be interfaced with PC directly
